

## Institutions of the Visiting Graduate and Undergraduate Students

*Allegheny College*  
*American University*  
*Citadel*  
*Clemson University*  
*Coastal Carolina University*  
*College of Charleston*  
*College of Saint Benedict*  
*Delaware state University*  
*Emory University*  
*Franciscan University*  
*Grinnell College*  
*Hawaii Pacific University*  
*Inter-American University of Puerto Rico*  
*Lake Superior State University*  
*Lyon College*

*Morris College*  
*National Institute for Basic Biology, Japan*  
*New York University*  
*Savannah State University*  
*South Dakota State University, Brookings*  
*Texas A&M University*  
*University of Connecticut*  
*University of Florida*  
*University of Hawaii*  
*University of Indianapolis*  
*University of Louisville*  
*University of Scranton*  
*University of South Carolina*  
*University of South Florida*  
*University of Southern Maine*

## Post-Doctoral Research Opportunities

Because of our state-of-the-art facilities and synergistic research environment, the HML attracts the very best in post-doctoral research fellows. In fact, opportunities abound for those post-doctoral researchers interested in developing advanced tools and/or assessing the impacts of environmental stressors on marine ecosystems and human health. In 2013, there were 15 post-doctoral fellows conducting research at HML. All of these individuals have contributed to HML's highly productive and collaborative research environment. Questions concerning opportunities for post-doctoral research at HML should be directed toward the principal investigators conducting work in a specific field of interest.

*View of batik displayed overhead in HML's front lobby. The artwork was created by Mary Edna Fraser, and the three silk fans combine to depict a portion of South Carolina's coast located near HML.*
